Multiplication Facts Practice Worksheets Arithmetic Workbook With Answers: Reproducible Timed Math Drills: Multiplying The Numbers 0-12

Synopsis

This workbook contains 100 multiplication facts worksheets. Each worksheet has 35 exercises. The first 20 worksheets focus on a single number's multiplication facts, which is good for beginning students. Worksheets 21-30 have the facts 1-10 mixed. Worksheets 31-50 have the facts 2-10 mixed (the 0's and 1's are now removed). Worksheets 51-100 are like worksheets 1-50 except that the numbers 11-12 are included. Each worksheet has designated room at the top for students to write their names and for teachers or parents to record the score and time. All of the exercises are numbered for easy reference. All of the answers are tabulated in the back of the book, also with numbers so that teachers or parents can easily check the solutions. The exercises are written with a size 14 font. The copyright notice allows teachers and parents who purchase this book to reproduce selected worksheets for their own students and children.

Customer Reviews

My son was struggling with his multiplication facts and timing. This book has 100 pages with 35 problems on each page and a space for keeping track of time. My son was assigned two pages a day and his facts and timing has improved greatly.

I got this for my after school third graders. They absolutely love these worksheets! They prefer them over the basic and simpler worksheets because there are more problems on the sheet. It gives them more to do. Would buy again!

This book is an awesome addition to my resources! It will be awesome to help my students learn

their multiplications. One thing I do advice is that it does not include multiplication by zeros all on their own. They are included with others though. Some students do have trouble understanding that zero multiplied by any number is still zero. Other than that, it's everything I needed. :D

My daughter is in 2nd grade and this book is helping so much, I highly recommend it for home use or if someone is homeschooling. I just love it

Groups then by number. Just what i needed to practice for school. Easy the make copies of pages. Good buy

I was worried about my daughter's multiplication in school, so this wonderful workbook came as a great help. It has reproducible timed math drills of multiplying the numbers 0-12. It not only includes individual multiplication facts but also mixed ones. My daughter did the practice every day for about 10 minutes. She loved the tricks and voluntarily made up her own problems to solve. She's already seeing how the techniques help her in her normal math work. For improving speed, I simply used the free printable worksheets on the Beestar website. It offers completely FREE math programs, and it is probably the best among the many learning sites. The worksheets are well-designed and have both time and accuracy targets set for your child to practice. When my daughter takes the online Beestar weekly tests, she often ranks high among her peers. I give credits to this book.

Highly recommend.

When my girls needed review of the multiplication facts, we sent to [for this workbook](#). They do 1 page daily which takes only a few minutes.

This is a great tool for really driving home learning success! My son loves it and even pushes himself to finish a page in under a minute!
